Even after watching your video im not sure who was stepped on your toes. I think you jump to conclusion on some superficial and less relevant reasons.

Before this gets heated up we need to get you back up above the line.

Ah damn... you sold off?

The bear market has been tough and Cardano not a great performer. I know that a lot of people are underwater on their buys. Still, the whole space is in its infancy - Cardano may need another year or two to show its worth. I hope you made the right decision for you.

Wish you the best of luck 😊

This is a great vid! Thanks for sharing. Having spent periods of life both above and below "the line", I can relate. There are certainly some Buddhist philosophies/teachings one could infer from this illustration. 😊

Nathan agree to pay me for my video content. Some ambassadors bypass Nathan decision and reject me. Nathan never accepted to give the reasons. Nathan want to talk on phone about it. I need text because speech fly, and text stay.

I made a huge investment in a internet fiber line 200/200Mbps for that job. All money spend for nothing.

So, as a Buddhist, I am a flat liner who enjoy the 3 states. Flat line, up and down states. The middle way is the key.

Nice video indeed, Thank you

I think some of the things in the video is valid criticism. And I am sad to hear of the losses of NostrADAmus. Since guardians protested not much has changed in Cardano Foundation itself. What has happened is that Emurgo and IOHK has stepped up the game, not CF. Granted I have a feeling Nathan had to do a lot of cleanup from previous management. But it does not change the facts the organization (who should have enough manpower to fulfill its goals imho or get it) for example has only a single news from its website since April. (<https://cardanofoundation.org/en/news/>) or if you go to twitter there are a few meetings published (<https://twitter.com/CardanoStiftung>) and from what I can see mostly on one of the objectives of Cardano Foundation ("Shape Legislation and Commercial Standards."). Important yes, but so much more could be done.

Why is not research focused into governance and the issues that will soon face us the users of Cardano when a treasury system is implemented?

What plans are there for ramp up of PR once Cardano is ready for it (for example when staking is up and first apps etc)?

Why is there only an ambassador program and dear lord why is Nathan even jokingly talking about "ninja's" on the IOHK summit talk? (<https://youtu.be/0Bn2NQP2i7A?t=28948> 2nd video). Frankly for a lawyer he is using surprisingly bad wording - for example ambassador that already by its name conveys a meaning of being more flawless or representing. The whole talk was massively underwhelming. He looked underprepared (had to go back again on stage etc). He talked about assuming people are doing their job but that is not the criticism, its that the foundation itself has very little activity.

In my mind Cardano Foundation would support development and research on the governance side of Cardano while supporting the ecosystem and ensuring its longevity and finally ensuring transparency and engagement with the community. In any case all of this has been long ago discussed, Bertalan had some great posts on this even before the Parson's incident.

Farewell Nos.

Well, actually I also have complain to Charles, CF, and IOHK regarding Shelley release.

And I believe that many of ADA investor also have the same feeling like you. But, cut lost 60% that is huge man.

And for IOHK, CF team I really hope this became a warning to you. If you lost one Cardano believer it's okay. If you don't fix your reputation and way of work. Imagine you lost 1,000 or 10,000 Cardano holder. It will hit CF badly, and go below 100th rank.

I see that there are many crypto project that are good. Unluckily they haven't get any exposure as ADA did. I really hope that this kind of situation never happend again in this community. This is bad for publication.

Hello [@CardaNostrADAmus](#) ,

I did not get a chance to view your video before you removed it, so my comment is based only on this post.

CardaNostrADAmus:

The insult is when Keiser offer me money if I apologies publicly and shut up for ever.

This is a serious allegation, could you please provide documentation to back it up?

I'm asking and I'm sure others would also but doing so can be viewed as harsh, which is not my intent.

My reason for doing so is to allow the community to take action on this, but to do so we need actionable documentation from you.

Thank you for providing it.

This is a french email from Keiser. He will for sure suit me in justice if I disclose it publicly. The most important is that now I know for sure what kind of CEO we have.

If you promise me to not disclose it publicly, I can provide you the short extract where he wrote it.

But if you disclose it publicly, Keiser risk to suit you and I will suit you too as it was a private mail exchange.

My good friend Bertalan ask me a copy too, I refused so far.

What service are you using for email, Gmail?

If you are then the content is already know to ABC, if you are using another non-encrypted service then it is the same, content is know already.

I see that IOHK discloses emails when it suits them, ousting former Foundation president.

The smartest move is to ask Keiser if he confirms or not.

If he deny it I will provide the proof that he lies. If he confirm , then you can mobilize the community to fire him.

No confusion, Keiser propose me to accept pay me IF:

1. Make a video to excuse myself (**Excuse for what ???**)
2. To make a public statement by text on forum to never, NEVER AGAIN attack an employee or member. (**That's Mental pressure**)
3. That is my very last chance if I want to be paid for my work. (**This is clearly blackmailing me**)

So all in all this is psychological pressure to force me to do what Keiser wants and mute me, my ideas, conviction and freedom of speech.

Not lying here, that made me throw up my lunch in toilet. No kidding , I throw up for long minutes.

We are not in China and these kind of pressure make me sick.
